

TUES, MARCH 3, 2026 | 10 AM - 2 PM
GOOGLE, 1190 BORDEAUX DRIVE
BUILDING 4, SUNNYVALE, CA 94089

AI stands for artificial intelligence, which is the ability of a computer or a machine to perform tasks that normally require human intelligence. In partnership with leading companies in this space, JA will host a summit to introduce work-based learning initiatives related to AI that will prepare students for the future world of work.

WHY? In a world increasingly shaped by AI, understanding this technology is the key to future employment and unlimited career potential. The AI industry is growing exponentially, demanding talent that can adapt and innovate. This summit will empower you to move from spectator to participant in the AI revolution.

HOW? JA NorCal's AI Career Summit provides exclusive access to leading AI professionals from top tech companies. You will participate in hands-on work-based learning workshops, receive career-defining mentorship, and explore direct pathways into high-demand AI and tech roles.

"The majority of my students, if not all of them, really enjoyed this summit. Some of them expressed that it was their favorite field trip they've taken so far. It expanded their notion of AI, how it is used, and how it can be applied across several career fields."

— Educator, Independence High School
